**First Electric Vehicle (EV) Power Station in Bonifacio Global City energized by Meralco and subsidiary MSERV.** Booming business district BGC becomes home to the first Meralco EV Power Station in a commercial area, with the recent launch of the facility in Net Lima. MSERV, Meralco's wholly-owned subsidiary, has installed charging pods that can accommodate two EVs.

The commissioning of the EV charging facility is in step with Meralco's agenda of pushing innovative and sustainable energy solutions. During the unveiling ceremony, Fort Bonifacio Development Corporation VP and Head of Commercial Operations Manny Blas II congratulated the pioneers of the project, "I think it's a big step, and more importantly, a big statement- that you're willing to explore new initiatives in better transportation, and you're also saying that you're willing to put your money where your faith is, by starting this."

Meralco, The Net Group, Mitsubishi executives, together with officers from Net Lima locators aboard the EV, powered by Meralco and its subsidiary MSERV.
